

BINH TRINH

Email: binhthaitrinh@csu.fullerton.edu | Website: www.binhtrinh.dev | Github: www.github.com/binhthaitrinh

I am a Javascript Frontend Web Developer with an eye for clean aesthetics and optimal User Experience via intuitive design. To grow my skills, I am focusing on building a full-stack application for a business called Talaria Order
Experienced in **Web Development, MERN Stack**

TECHNOLOGIES USED

Front End: HTML5, CSS3, Sass, JavaScript, React, Redux
Back End: NodeJS, Django, Python, Java, MongoDB, MySQL

Version Control: Git, Github
UI / UX: Adobe XD, Photoshop, Prototyping

PERSONAL PROJECTS

★ **YELP CAMP** | <https://yelp-camp-react.herokuapp.com>

December, 2019

A MERN Stack Application that lets you create, like, and comment on popular camping sites

- Built **RESTful Web API** using expressJS for **CRUD Operations** for campground management, user registration, and **authentication**, user comments, and likes
- Used **mongoDB** to store data due to its ease of management
- Used **React / Redux / Sass** to create a Single Page Application that enhances user experience
- Used **Github Actions** to automate Continuous Deployment on Heroku

★ **MOVIEDB** | <http://www.themoviedb.me/>

February, 2020

A Single Page Application that lets you browse Movies and TV Shows

- Used a **public API (TMDB)** to query necessary data for the website
- Used **Downshift** to implement the auto-complete movie searching functionality, in combination with **lodash.debounce** to improve performance
- Used **Higher-Order Functions** pattern to abstract over the process of querying Movies, TV Shows

★ **TALARIA ORDER OFFICIAL WEBSITE** | <https://talariaorder.com/>

June, 2020

The official website for Talaria Order

- Used **Gatsby.js** to ease the process of building a blazingly fast, modern website
- Integrated with **Facebook Messenger** to allow visitor chat with support
- Used **Figma** to design the prototype before coding
- Used **Netlify CLI** as a deployment platform that supports built-in CI/CD, domain & DNS management

EXPERIENCE

Co-founder & Software Engineer

Talaria Order [Feb 2020 - now]

- Built the Company Website resulting in a **50% increase in traffic**
